

Description:

The Industrial Commission was established to impartially and efficiently administer the Idaho Workers' Compensation Law in a manner that encourages a safe work environment, prompt, accurate benefit payments, timely dispute resolution, and quality vocational rehabilitation services at a reasonable cost to employers. Program Results and Effect:

The Compensation Division has continued to meet or exceed all performance Parameters, while significantly increasing its emphasis on customer outreach activities. These activities center around site visits to sureties and employers across the state. During these visits, staff members audit company compliance with statutory and regulatory requirements, provide training to company employees, and share innovative and efficient practices encountered during visits to other companies. Continued efforts to expand our acceptance of electronically submitted First Reports of Injury will result in a reduction in our manual data entry requirements. Employees formerly engaged solely in data entry are being trained to perform reviews of summaries of payments, enhancing the Commission's efficiency and production.

Program Results and Effect:

The Commission's Rehabilitation Division continues to be extremely effective in assisting injured workers in their return to employment. Last fiscal year's statistics show workers rehabilitated by the division retaining their pre-injury wage earning level. In addition to benefiting workers, this has a positive financial effect on employers in terms of reduced disability payments.

Program Results and Effect:

During FY 2002, the Commission continues to process work flow of the Crime Victims Compensation Program (CVCP) below targeted goals in most areas. Over this fiscal year the program assumed the responsibility of processing and paying for Sexual Assault Forensic Examinations statewide. With this additional responsibility, the program netted a 33% increase in the number of claims filed and paid out approximately 14% more in benefits on behalf of crime victims. This increase in workflow has negatively impacted the program's ability to improve upon or meet targeted processing goals over FY 2002.

The Adjudication Division continues to focus its efforts on the timely resolution of disputes. In FY 2003, the average time to issue a workers' compensation decision was 40 days, an average substantially in keeping with the 90-day goal. The average time required to issue a decision in unemployment insurance appeals during FY 2003 was 37 days, which continues to exceed federal standards for processing upper level appeals. The mediation program continues to play an integral role in the expeditious resolution of workers' compensation disputes, providing informal facilitation of settlement negotiations among the parties.
